Muhammad Muaz Shoukat

SOFTWARE ENGINEER | FULL-STACK & PYTHON DEVELOPER

muazdev01@gmail.com | +92 301 4913826 | Lahore, Pakistan

WORK EXPERIENCE

Python Developer
July 2025 – Present

Passivebolt (Full-Time Contract)

- Investigated and integrated complex FIDO security protocols, Easy Provisioning workflows, and biometric authentication models for digital wallet architectures.
- Managed high-priority feature tickets for fundamental infrastructure applications including billing-service and core orchestration agents (org-agent).
- Designed backend business logic and API integrations tailored for hospitality domain microservices and private pass credential models.

Python Developer (Part-Time)
Feb 2025 – July 2025

Passivebolt

- Researched, tested, and executed Apple Wallet and Google Wallet provisioning test suites to enable seamless digital pass distribution.
- Contributed to foundational security engineering tasks focusing on smart lock and secure access ecosystem integrations.

Associate Software Engineer
Apr 2024 – July 2025

Codefulcrum

- Architected and deployed data pipeline synchronizations utilizing custom Change Data Capture (CDC) systems, database triggers, and scheduled workers.
- Executed seamless user data migrations to scalable cloud-hosted databases (Supabase), establishing custom schema authorization rules and relational integrity.
- Collaborated on modern backend microservices to optimize API responses, handle complex database workflows, and reduce query latencies.

Web Developer Intern
Dec 2023 – Mar 2024

Bright Line Solutions

- Developed critical frontend components of the administrative dashboard layout for a scalable Property Management System (PMS).
- Revitalized consumer-facing UI modules on an enterprise Vue.js application to significantly optimize loading speeds and responsiveness.

PERSONAL PROJECTS

Success.ai (AI B2B Prospecting Platform) ↗ Live Link
Tech: Next.js, Node.js, OpenAI API, LangChain, RAG

- Built an AI-powered lead-generation and outreach platform featuring GPT-based lead qualification, personalized messaging, and retrieval-augmented generation (RAG) over company data.

OhmConnect (Smart Energy & IoT Platform) ↗ Live Link
Tech: Python, Flask, PostgreSQL, AWS

- Built device connectors for Tesla Powerwall, Google Nest, ecobee, Sensi, and Wemo, fixed core energy-savings and rewards algorithm bugs, and optimized query performance.

KeyShare (NFC Digital Identity Platform) ↗ Live Link
Tech: Python, FastAPI, Flask, Apple & Google Wallet

- Developed backend services that deliver hotel room keys, building passes, and digital IDs directly to native mobile wallets via a single NFC tap.

SKILLS

Languages & Core
Python | JavaScript | TypeScript | OOP | DSA | Code Analysis

Frameworks
React.js | Next.js | Node.js | Express.js | Vue.js | Redux | React Native

Databases & Cloud
PostgreSQL | MySQL | Supabase | MongoDB | Firebase | REST APIs

DevOps & Tools
Git | GitHub Actions | CI/CD | Shell Automation | Linux

EDUCATION

BS Computer Science
COMSATS University
2020 – 2024 | CGPA: 3.2

F.Sc Pre-Engineering
Islamia College Civil Lines
2018 – 2020

ACHIEVEMENTS

Top Rated Freelancer
Upwork status with a 100% Job Success Score (JSS).

Open Source
Active code and resolution contributor on GitHub and StackOverflow.
